# Innovate

Hospital Radiology departments and Diagnostic Imaging Centers can no longer be content to provide x-rays, ultrasounds and CT scans. Imaging technology continues to advance, and most referring physicians expect high tech, fast results. You have two options: hire additional staff with expertise in these techniques, or add 'partners' to your practice without the expense.

Third Eye Teleradiology brings all the advances to your skill set:

Virtual Colonoscopy, Cystoscopy and Bronchoscopy

CT enterography

CT urography

MRA and CTA, Coronary/Cardiac imaging

CT perfusion

**Let us be your partner. You take the credit, you make the profit.**
